

# MEMORIALS

## Database Analysis

Marijan Dovič, ZRC SAZU  
January 2014

### Summary

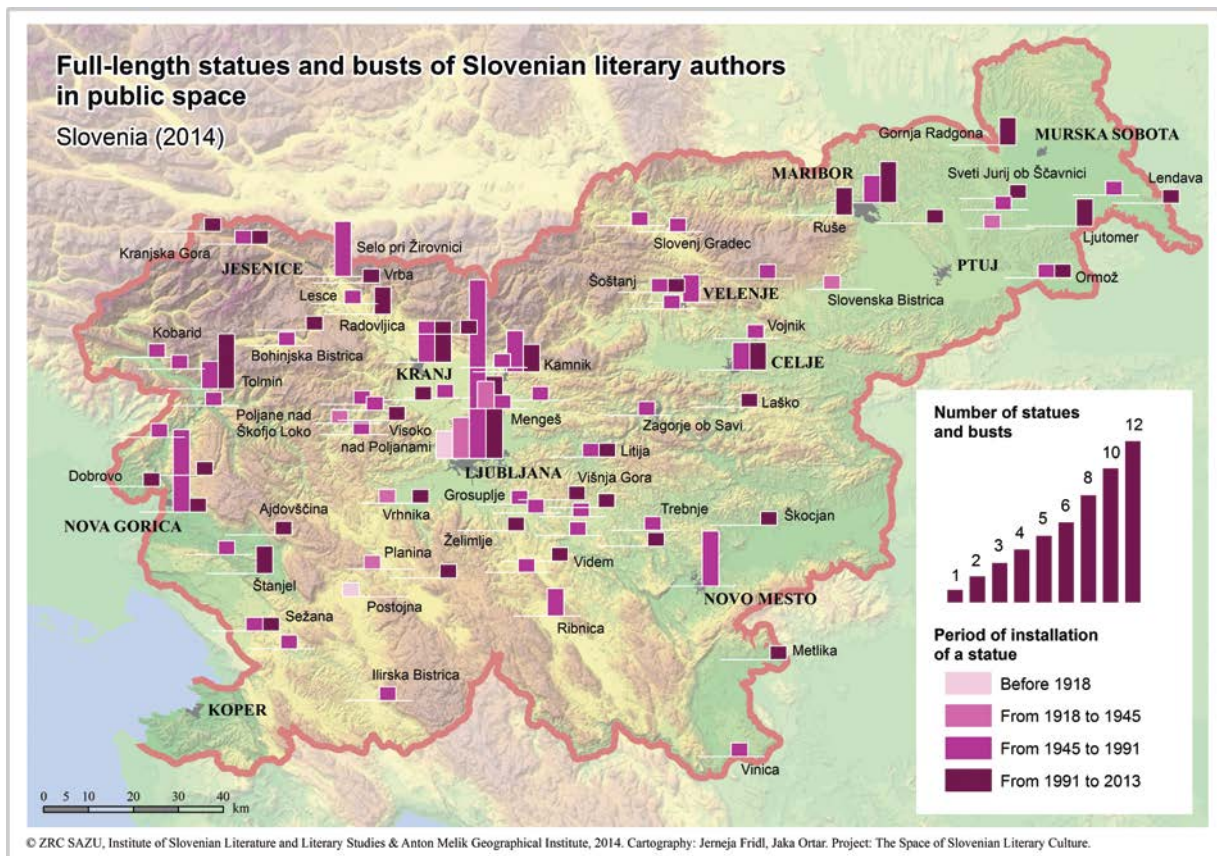

The article presents the basic features of the database of memorials in Slovenian literary culture that was produced as part of the project The Space of Slovenian Literary Culture. The database includes GIS-references and comprises various types of memorials to 323 selected individuals who played major roles in the formation of the space of Slovenian literary culture in the years 1780–1940. The total number of registered memorial units is 1676. The tables and sample maps are employed to demonstrate some of the database's possible applications. The four maps are presenting the spatial distribution of full-length statues and busts of Slovenian literary personae and numerous memorials to France Prešeren in Slovenia and abroad.

## MAPS

**Map 1: Full-length statues of Slovenian literary personae**

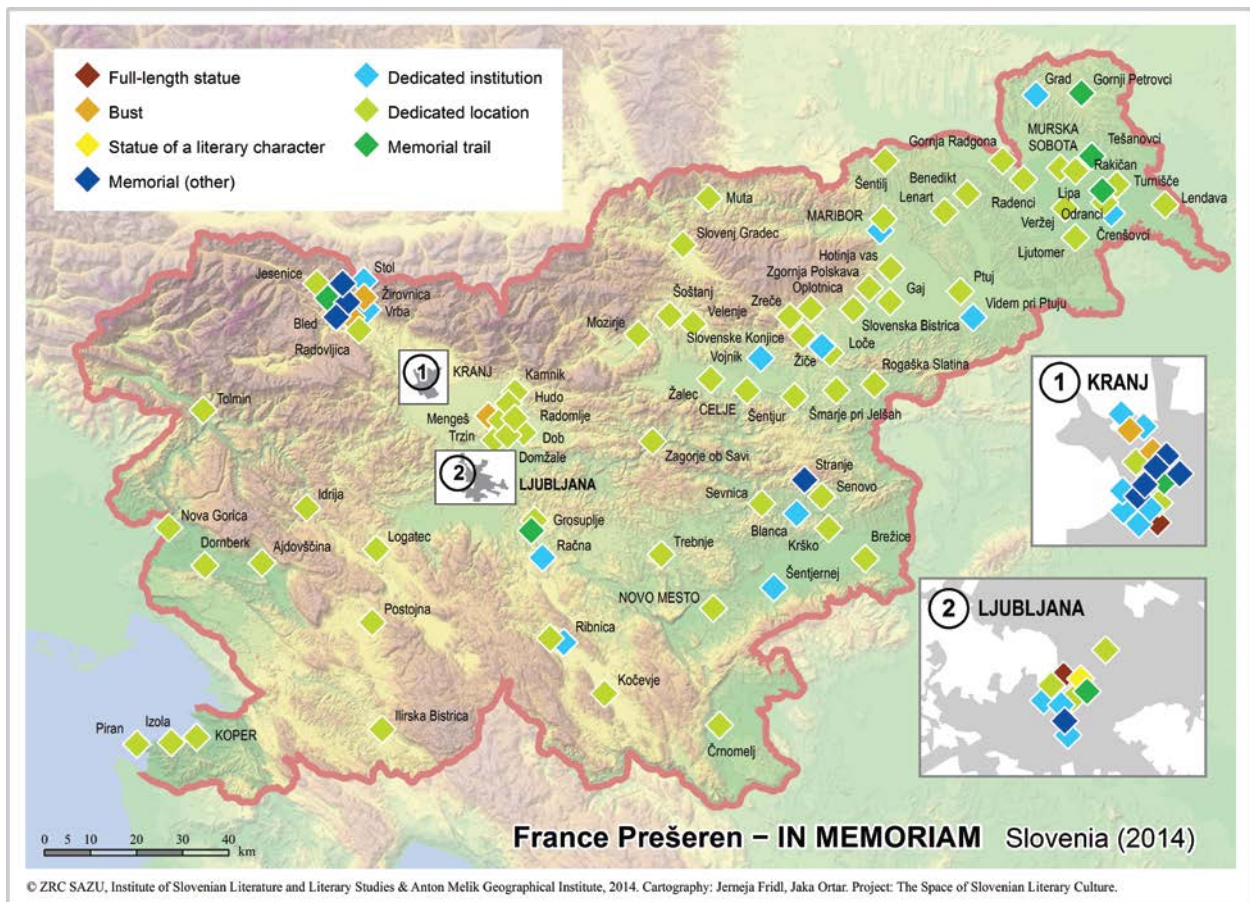

**Map 2: Full-length statues and busts in Slovenia in four periods**

**Map 3: Memorials to Prešeren in Slovenia**

**Map 4: Prešeren memorials outside Slovenia**
